# Plarox PR10

## Heating multi-plates

Datasheet, 04.04.2023, V2.0

Engineered and made in Switzerland

The Plarox PR10 is a machine used to heat a large quantity of watches before the condensation test.

The temperature of each heating plate can be adjusted independently of the others.

## Machine functions

- Plates for heating the watches before the condensation test
- Large capacity (ideal for large series)
- Temperature adjustable by electronic regulator
- Uniform temperature over the entire surface
- Pivoting plate
- Touch-screen
- Can be mounted on a workbench or on the Aquapress PXX

### Software functions

- Intuitive menus in 5 languages
- Simple and intuitive programming
- Common or independent programs for each plate
- Daily and weekly operating times can be defined

## **Technical specifications**

Supply voltage : Power : Capacity : Heating temperature \* : Weight : Maximum dimensions (l/d/h) : 230 V / 50 Hz 2300 W Up to 200 watches (10 trays) 30 to 65 °C 40 kg 715 x 815 x 500 mm
